

Código

models.py

```
from django.db import models

# Create your models here.
class Producto(models.Model):
    name = models.CharField(max_length=20, verbose_name='Nombre del producto')
    type = models.CharField(max_length=20, verbose_name='Tipo de producto')
    price = models.DecimalField(max_digits=7, decimal_places=2, verbose_name='Precio' )
    class Meta:
        ordering = ['name', 'type']
        verbose_name = 'Producto'
        verbose_name_plural = 'Productos'
```

views.py

```
from rest_framework import viewsets, permissions
from .models import Producto
from .serializers import ProductoSerializers

# Create your views here.
```

```
class ProductoViewSet(viewsets.ModelViewSet):
    queryset = Producto.objects.all()
    permissions_classes = [permissions.AllowAny]
    serializer_class = ProductoSerializers
```

serializer.py

```
from rest_framework import serializers
from .models import Producto

class ProductoSerializers(serializers.ModelSerializer):
    class Meta:
        model = Producto
        fields = ('name', 'type', 'price')
```

urls.py

```
from rest_framework import routers
from .views import ProductoViewSet

router = routers.DefaultRouter()
router.register('productos-hellb', ProductoViewSet, 'productos/hellb')

urlpatterns = router.urls
```
