

Código

models.py

```
from django.db import models

# Create your models here.
class Producto(models.Model):
    name = models.CharField(verbose_name='Producto', max_length=100)
    price = models.DecimalField(verbose_name='Precio', max_digits=10, decimal_places=2)
    created = models.DateTimeField(auto_now_add=True)
    class Meta:
        ordering = ["price"]
        verbose_name = "Producto"
        verbose_name_plural = "Productos"
```

serializers.py

```
from rest_framework import serializers
from .models import Producto

class PSerializers(serializers.ModelSerializer):
    class Meta:
        model = Producto
        fields = ["name", "price"]
```

pagination.py

```
from rest_framework.pagination import CursorPagination

class CursorPagination(CursorPagination):
    page_size = 4
    ordering = "-name"
```

views.py

```
from django.shortcuts import render
from rest_framework import generics
from .pagination import CursorPagination
from .serializers import PSerializers
from .models import Producto
# Create your views here.
class VokPaginationListView(generics.ListAPIView):
    queryset = Producto.objects.all()
    serializer_class = PSerializers
    pagination_class = CursorPagination
```

urls.py

```
from django.urls import path
from .views import VokPaginationListView
urlpatterns = [
    path("vok/pagination/", VokPaginationListView.as_view(), name='vokp')
]
```
